

Boston Home Price Index Analysis

Jiayuan Shi

November 5, 2015

0.1 Introduction

In 2008, the US economy faces the most dangerous financial crisis, which expanded to Asia, Europe and other places around the world. The stock market was plummeted nearly 0.3; credit market was ceased to function; Lehman Brothers went bankrupt overnight; Prices of houses was dropping and people had low faith to the economy.

In the first chapter of Nate Silver's *The Signal and the Noise*, we were told housing prices continued their inexorable decline, falling a lot during 2008. Now we are looking into the historical home price index for Boston. We want to compare the changes of housing price in U.S.A from 2000 to 2015, in order to see if there is a larger falling in 2008.

This home price index seeks to measure the value of residential real estate in the City of Boston from year 2000 to 2015, on a monthly basis. For more details, please go to the following website: <http://us.spindices.com/indices/real-estate/sp-case-shiller-20-city-composite-home-price-index>.

0.2 Analysis

0.2.1 Graph

First, we make a graph to show housing price monthly change in Boston.

Figure 1: Housing Price Change from 2000 to 2015

In the graph, we find that the housing price of Boston is firstly growing-up then falling-down, and growing up again. The housing price increases a lot from 2000, but start to decrease from 2005, and increase a lot again from 2011.

There is a graph from the S&P website about the home price index for Boston during 1985 and 2015, which we can also see the same "up-down-up" pattern from 2000 to 2015.

Figure 2: Housing Price Change from 1985 to 2015

0.2.2 Table

The yearly mean housing price of Boston is presented in table. And we calculate the year-over-year housing index change.

Table 1: Housing Price Change from 2000 to 2015

Year	Boston	Change
2000	108.2792	
2001	125.17	15.60%
2002	139.5625	11.50%
2003	153.2692	9.82%
2004	167.7067	9.42%
2005	179.6558	7.12%
2006	176.3108	-1.86%
2007	169.2792	-3.99%
2008	159.6875	-5.67%
2009	151.8183	-4.93%
2010	154.6858	1.89%
2011	151.5858	-2.00%
2012	152.2992	0.47%
2013	163.2817	7.21%
2014	173.6267	6.34%
2015	178.4414	

From the chart, we can also see that the housing price of Boston increases a lot from 2000, but start to decrease from 2005, and increase a lot again from 2011. From 2007 to 2009, the housing price a larger decrease, which is -5.67%

and -4.93%.

0.2.3 Equation

The equation about how to calculate the year-over-year housing index change is shown below.

$$f(x) = \frac{y_t - y_{t-1}}{y_{t-1}} * 100$$

0.3 Conclusion

To sum up, the housing price of Boston is firstly growing-up then falling-down, and growing up again. The housing price increases a lot from 2000, but start to decrease from 2005, and increase a lot again from 2011. From 2007 to 2009, the housing price a larger decrease, which is -5.67% and -4.93%. The conclusion is consistent with Nate Silver's book *The Signal and the Noise*, in which we were told housing prices continued their inexorable decline, falling a lot during 2008.
